# Product Datasheet fiber optic cable: InAir ADSS MT Aramid DJ-48U (4x12)-9kN

Order information					
Design	Part number				
InAir ADSS MT Aramid DJ-48U (4x12)-9kN	0325-97346-18				

Other fiber counts available upon request

#### Typical application and features

- Aerial installation between poles and buildings
- Aerial installation on powerlines
- Aerial installation for communication lines
- Pulling into underground ducts and sewer pipes
- Installation along bridges, tunnels and other structures
- Installation into indoor/outdoor cable conduits and trays

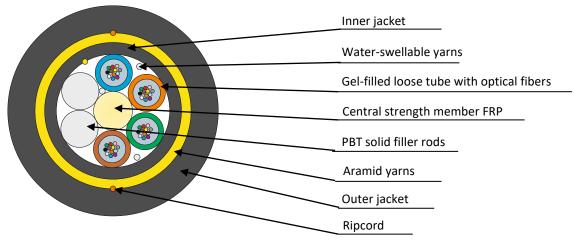

All-dielectric design

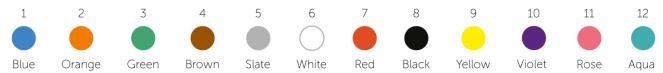

**UV-resistant** 

#### Design

Cable consists of stranded core with central strength member (FRP), gel-filled loose tubes with optical fibers and PBT solid filler rods (natural color). Stranded core is fixed by water-swellable yarns. Inner jacket is made of MDPE. One ripcord is laid under inner jacket. Aramid yarns are laid over inner jacket. Outer jacket is made of HDPE. Two ripcords are laid under outer jacket. Meets IEEE 1222-2011.

#### Optical fibers and loose tubes color identification:

Other colors upon request

### **Cable marking example**

Marking is made on each 2 feet of cable

#### Reel packing and marking

Cables are supplied on non-returnable wooden reels. Reel diameter is not less than 40 diameters of the cable. Not less than 2 m of inside end of the cable is fixed to the reel flange. The cable ends are sealed with waterproof covers. The label on the outer reel flange contains our trademark, cable type, customer's name and PO, reel number, production date, cable length, cable weight net/gross.

The following information is printed on the reel flange: manufacturer's name and website, rotation direction, cable end indication, shipping and handling summary, labels "Fragile" and "Handle with care".

Our cable passport shows: cable type, technical standard number, cable length, fiber type, fiber coloring, fibers per tube, tube identification coloring, final attenuation for all fibers, refractive index of the fiber, fiber manufacturer and production date.

Cable passport is affixed to the inner flange in a plastic bag. Additional information can be included on the passport upon request.
